PROFESSIONAL SUMMARY

Software Developer with professional experience delivering production-grade web applications using React and Next.js. Skilled in building performant, accessible UIs, crafting rich interactive experiences, and integrating complex REST APIs. Backed by solid knowledge of backend systems and microservices architecture, enabling effective collaboration across the full stack.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, C++, Java, Python
- **Frontend:** React, Next.js (App Router, SSR), TailwindCSS, Framer Motion, Radix UI, Redux, shadcn/ui
- **Backend & DB:** Node.js, Spring Boot, FastAPI, MongoDB, PostgreSQL, Redis
- **Tools:** Docker, Git, Axios, Firebase, JWT, REST APIs

PROFESSIONAL EXPERIENCE

Frontend Developer

January 2026 – Present

Sapran

- Built a content-rich web application using Next.js 16 (App Router) and React 19, optimizing for SSR and SEO performance
- Engineered a centralized API layer with Axios interceptors, handling Bearer token authentication across 20+ data services
- Developed interactive UI components and a custom Rich Text Editor using Tailwind CSS v4 and Framer Motion
- Constructed a full-featured Admin Dashboard with CRUD operations and Firebase Custom Authentication

Frontend Developer

September 2025 – November 2025

Daira Platform

- Engineered a research and publication platform using Next.js 16 and React 19, optimizing SEO for thousands of papers, journals, and policy briefs
- Developed a custom rich-text editor using the Lexical framework with advanced formatting, media embedding, and content authoring support
- Built a CMS dashboard for managing authors, publications, and events, with Axios-based API integration and Firebase Storage for media assets
- Architected a modular TypeScript codebase with accessible UI primitives using Radix UI and Tailwind CSS v4

PROJECTS

KUMO – AI-Powered Coding Assessment Platform

📄 GitHub

Next.js 15, TypeScript, Prisma, PostgreSQL, TailwindCSS, Axios, Spring Boot, Docker

- Built a role-based instructor and student dashboard with Next.js 15 App Router, React Server Components, and dynamic nested layouts
- Developed a resizable split-pane code editor with an integrated AI chat panel supporting real-time

streaming LLM responses

- Implemented a reusable UI component library (Button, Modal, Card, Toast, Skeleton) and a full repository/controller architecture with Jest unit tests

Baksho – Microservices Crowdfunding Platform

 **GitHub**

Next.js, React, TailwindCSS, shadcn/ui, Axios, next-themes, AWS S3, Spring Boot, JWT

- Built a full-featured crowdfunding frontend with campaign listing, detail, creation, payment, and admin analytics pages
- Implemented dual Axios client strategy (public/private) with JWT interceptors and context-based global state for auth, campaigns, and notifications
- Integrated AWS S3 file uploads via a Next.js Route Handler proxy and a dark/light theme system using next-themes and shadcn/ui

ClassEdge – Learning Management System

 **Client**  **Server**

React, Node.js, Express, MongoDB, JWT

- Built a full-stack LMS with role-based access control for admins, teachers, and students
- Implemented course management, assignment submission, and grading workflows
- Designed a responsive UI with efficient REST API integration

EDUCATION

Bachelor of Software Engineering

Islamic University of Technology (IUT – OIC)

2023 – Present

ADDITIONAL

- Strong understanding of Data Structures and Algorithms
- Certified: Complete Web Development – Jhankar Mahbub (6-month program)
- Active cricketer – demonstrating teamwork, strategic thinking, and discipline under pressure
